

# MADI ALENOV

BACKEND DEVELOPER

## CONTACT

- ✉ alenovm1@gmail.com
- 📍 Kazakhstan, Astana
- 🌐 Telegram: @hsokidam
- 🐙 github.com/alastrm

## SKILLS

- Backend
  - Python, FastAPI, Django,
  - PostgreSQL, Redis, REST
  - APIs, Celery
- Frontend
  - React, TypeScript, Tailwind
  - CSS
- DevOps & Tools
  - Docker, Git, Linux, Vercel,
  - CI/CD

## LANGUAGES

- English — B2 (Upper-Intermediate)
- Russian - Native
- Kazakh - Native

## EDUCATION

- Software Engineering
  - Astana IT University College
  - 2023-2026
- Astana International University
  - 2026-2029

## PROFILE

Software Engineer focused on backend development and system architecture. Experienced in designing and building reliable web applications, solving technical problems, and contributing across the software development lifecycle.

## PROJECT EXPERIENCE

### Forge — Container Deployment Platform

Python, Docker, Traefik, Linux, Bash, unittest

- Built a lightweight zero-dependency CLI engine using Python stdlib to automate container builds, networking, and lifecycle management.
- Implemented Blue-Green deployments with automated Traefik reverse proxy routing and graceful container termination (SIGTERM).
- Designed in-container health checks via Docker exec without exposed host ports; configured isolated bridge networking.

### Mentora — AI Educational Platform

FastAPI, PostgreSQL, SQLAlchemy (Async), Redis, Docker, Flutter

- Built an asynchronous backend orchestrating parallel LLM generation pipelines via asyncio.
- Handled quota concurrency using PostgreSQL row locks (FOR UPDATE) and stored trees in JSONB.
- Implemented in-memory file exporters for Anki flashcards (.apkg) and slide decks (.pptx).

### Booking Service — WorldSkills Competition (2nd Place)

Django (Booking Project)

- Developed a full-featured booking system under strict time constraints, securing 2nd place in the city-level stage.
- Designed relational database schemas and implemented core backend business logic, validation, and API endpoints.

## WORK EXPERIENCE

### Frontend Developer — iQadam Systems

October 2025 - July 2026

- Developed and maintained responsive UI components across core modules of the application.
- Integrated frontend client interfaces with backend REST APIs, collaborating on request schemas and data contracts.
- Diagnosed and resolved UI/UX issues and frontend bugs within an existing production codebase.
